

Meeting Agenda

Continuous Assessment for Revision Control

Meeting Details

Date: [TBD]
Time: [TBD]
Location: [TBD]

Attendees:

- **Clients:** [TBD]
- **Developers:** Hrushikesh Emkay, Josh Jenkins, Yuxuan Wang, Mihaly Toth-Tarsoly, Jack Dempsey

Meeting Objectives

- Introduce team members and establish communication channels
- Review and clarify project requirements and scope
- Discuss technical approach and architecture preferences
- Align on timeline, milestones, and deliverables
- Define next steps and action items

Agenda

1. Introductions and Welcome

- Team introductions
- Roles and responsibilities
- Communication preferences

2. Project Overview

- Overall queries about the project
 -
- Target Users and Key Stakeholders
 - Is this application aimed at just computer science students or students from other courses?

3. Requirements and Scope

- Core features and functionality
 - What features are non-negotiable within the final product?
- Minimal Viable Product (MVP)

- What are the functional expectations for the MVP?
- Nice-to-have items
 - What features would a perfect solution contain?
- Integration requirements
 - Are there applications with which the software will have to integrate with?

4. Technical Discussion

- Proposed technology stack
 - Is there a preferred technology stack for the project?
- Existing systems
 - Are we building this application from scratch or adding onto an existing system?
- Security and compliance requirements
 - Do you have any security and compliance concerns?
 - We are already aware of these:
- Performance and scalability needs
 - What size of target audience is this application supposed to cater for?

5. Timeline and Milestones

- Project phases and key milestones
 - Minimal Viable Product (MVP) Release: 20th November
 - Beta Release: Week 17
 - Final Release: Week 24
- Are these alright as rough dates, is there any reason why feedback couldn't be given on these dates?

7. Open Questions and Discussion

-
-
-

Follow-up

Next Meeting: [Date , time and Location]

Availability: [Available for consistent meetings and Feedback Sessions?]
